akashsingh.130912@gmail.com

DELHI

SUMMARY

Motivated cybersecurity enthusiast seeking opportunities in SOC and network security roles. Possess foundational knowledge of networking, Linux, and security tools such as Nmap and Wireshark. Quick learner with strong problem-solving skills and a strong interest in cyber defense and continuous learning. Eager to apply theoretical knowledge in real-world security environments and contribute to monitoring, analysis, and incident response activities.

EDUCATION

SGTBIMIT

Affiliated to GGSIPU

Bachelor of Computer Applications (BCA)
2023 – 2026

SKILLS

- Networking Fundamentals
- Linux (Basic)
- Cybersecurity Fundamentals
- SOC Basics
- Nmap
- Wireshark
- Network Monitoring & Traffic Analysis

CERTIFICATIONS

- Cybersecurity Summer Internship (Project-Based Training) – Grass Tech
- Cloud Computing Fundamentals (IBM) (jan,2026)
- Cloud Essentials (IBM) (oct 2025)
- Cybersecurity Fundamentals (IBM) (april 2026)

ONLINE PROFILES

- LinkedIn: [linkedin.com/in/0xAkash404](https://www.linkedin.com/in/0xAkash404)
- GitHub: github.com/0xAkash404
- TryHackMe: tryhackme.com/p/0xAkash404

PROFESSIONAL EXPERIENCE

GrassTech (Internship)

- Gained hands-on exposure to networking concepts and cybersecurity fundamentals
- Worked with security tools such as Nmap and Wireshark
- Learned basics of network monitoring, traffic analysis, and vulnerability identification

PROJECTS

DNS Record & Geo Lookup Tool

- Developed a DNS Record & Geo Lookup tool to retrieve domain DNS information and geographic location details. Improved understanding of DNS records, IP resolution, and basic network reconnaissance concepts.

AI Image Generator Tool

- Built an AI Image Generator tool capable of generating images based on user input prompts. Gained exposure to AI concepts, user input handling, and tool integration in real-world applications.

TryHackMe Practice Labs

- Completed hands-on SOC, networking, and security labs; achieved **Rank=165972** through continuous practice.

Home Lab Setup

- Built and maintained a cybersecurity home lab to practice networking, SOC fundamentals, and security analysis. Gained hands-on experience through tools, projects,.
